Situation Update

Economic situation

- In April, the monthly average price of WFP's standard reference food basket increased by **8 percent** compared to March 2022, according to the latest [WFP Syria Market Price Watch Bulletin](#). The nationwide average reference food basket price reached SYP 321,994 (USD 114.4 at the official exchange rate of SYP 2,814/USD), marking a new record high for the eighth consecutive month since WFP started price monitoring in 2013.
- Food prices in April were 59 percent higher than six months ago, and 84 percent higher compared to the same time last year. The increase is mainly attributed to the ongoing fuel shortage countrywide, as well as to an increase in global food prices, inflation and the Ukraine crisis.
- The ongoing crisis in Ukraine continues to fuel hikes in global commodity prices, inflation as well as freight costs. High imports dependency (wheat flour, bulgur, rice, cooking oil, sugar and petrol among other items) aggravated by poor performing agriculture-seasons and
